## Description:

EGDL60 series is an indoor constant voltage LED DALI power supply with an input voltage range of 198-264Vac, whose efficiency is up to 88%, adopt fanless design, it's working in the temperature range of - 20 ° C to + 45° C under free air convection. It has a high power factor, ultra-low total harmonic distortion, low standby power consumption and other comprehensive protection functions, which not only greatly improve the reliability of the product, but also guarantee the product life cycle. This series of products is designed for LED lighting and is used in indoor lighting applications. They are suitable for a wide range of applications in almost any environment where LED luminaires can be installed. Comply with DALI2.0 standard (IEC 62386-101, 102, 207, 209), Innovative thermal management technology, intelligent protection of power supply life.

## Model:

Model	Output voltage	Output current	Max. Output power	Output voltage precision	Total harmonic distortion (Typ.)	Power factor (Typ.)	Efficiency (Typ.)
EGDL60-24VF6	24V	0-2.5A	60W	±5%	8%	0.95	88%

**Remark:** All the parameters are measured at 230VAC input, full load and 25 °C of ambient temperature if they are not specially mentioned.

### PUSH Dimming/Change Color Temperature

Dimming: Long press

Switch: Short press

Dimming Memory: When the light is switched on after turn off, return to the previous adjusted brightness level.

Brightness and color temperature are adjusted in opposite directions with each long press.

Long press for more than 15s is the synchronization function, and all devices are adjusted to 50% level. Long press again to lower the brightness (color temperature will be unified to 4500K, and long press again to lower the color temperature)
